AR...The Force Behind The Field

AR's High Intensity Radiated Fields (HIRF) Equipment Designed To Meet Tomorrow's Needs

Inherent danger associated with High Intensity Radiated Fields (HIRF) is becoming increasingly evident with the growing complexity of military and aircraft systems. Sources of HIRF include high power radars, weapons, and naturally occurring environmental conditions. Unprotected equipment can fail with potentially devastating results. So to prevent possible catastrophes, you must qualify them for harsh HIRF environments by testing the equipment with AR amplifiers and power-matched antennas.

AR's ability to provide test systems with the highest power wide band amplifiers and power matched antennas to produce these HIRF and other high field environments has become AR's claim to fame.

With the recent acquisition of Sunol Sciences, now SunAR RF Motion, AR can offer a broad range of complementary positioning equipment and reverberation tuners for EMC and HIRF testing; all from one company.

Whether you're generating HIRF per MIL-STD-464 testing, DO-160, or recreating RF/microwave environments for intelligence/counterintelligence/jamming measures, and infrastructure susceptibility testing, AR has the range of solutions to make you feel at ease. And don't forget AR's limitless service and support network is second to none.

To learn more, visit www.arworld.us/hirf or call us at 215-723-8181.

ISO 9001:2008 Certified

We don't just build great products.
We build great products that last.

2017 EMC TEST LAB DIRECTORY

WHEREVER YOU ARE IN THE WORLD you now have access to local testing facilities. We have created an easy-to-use directory of global labs and their services grouped alphabetically by country, state and city, so that our readers can identify labs closest to them. We have strived to make this directory as accurate as possible; our goal is to have the most concise, informative and up-to-date information.

E-mail any additions, revisions and suggestions to info@interferencetechnology.com

MiCOM Labs®
opening wireless markets

An A2LA Accredited test lab for all of your international RF and EMC product certification and testing needs.

Proprietary Compliance Services

MiTest™

Create preliminary on-the-fly test reports at the push-of-a-button in minutes instead of weeks using our proprietary automated test system.

MiCert®

MiCOM Labs MiCert® system is a web-based, intelligent document repository designed for companies managing product certifications globally.

MiEMC

Use your mobile device to create a test plan for your product, store results in the cloud, and generate test reports for a specific standard or list of standards.

Contact us today to find your testing and certification solution.

HAEFELY HIPOTRONICS

THE PERFECT PAIR.

AXOS 8

COMPACT IMMUNITY TEST SYSTEM

The new AXOS 8 integrates all of the best features of a modern conducted immunity test system into one single user-friendly and economic solution.

- 7 kV Surge Combination Wave
- 5 kV EFT/Burst
- 7 kV Ring Wave
- Voltage Dips
- Pulse Magnetic Field
- 7 kV Telecom Wave

ONYX

ESD SIMULATOR

The ONYX is a state of the art ESD simulator, available in 16 kV or 30 kV versions. It is the most economical 30 kV simulator without an additional base control unit that can be battery or mains operated.

- 16 kV & 30 kV version
- Battery or mains operation
- Conveniently changeable RC networks
- Predefined tests according to the standards
